+917353181715 | surajkhanpinjar@gmail.com |

Professional Summary:

Result-oriented Java Spring Boot Developer with 5+ years of experience in microservices, REST API design, and application performance optimization. Skilled in delivering high-quality, secure code by resolving critical production issues and vulnerabilities. Strong background in CI/CD pipeline management, agile practices, and mentoring junior developers.

Skills:

Languages & JVM: Java (JDK 8, 17, 21)

Core Technologies: Core Java/J2EE, Microservices, REST API (Spring RestTemplate)

Principles & Patterns: SOLID Principles, Design Patterns

Frameworks: Spring Boot, JPA, Hibernate

Databases: MySQL, Oracle SQL

IDEs: IntelliJ, Eclipse, VSCode

Dev & Build Tools: Maven, Gradle

Version Control: SVN, GitHub

API Tools: Swagger, Postman

DevOps & CI/CD: Docker, Jenkins (CI/CD pipelines), Kafka, Splunk, PuTTY, Azure DevOps (ADO CI/CD)

Bug Tracking: JIRA

AI Tools: GitHub Copilot, ChatGPT, Gemini

Work Experience:

Future Focus - Financial Services Project

June 18, 2025 – Exp LWD - 05/01/2026

- Working in Agile methodology, delivering 5-6 story points per sprint consistently.
- Developing RESTful APIs adhering to SOLID principles and appropriate design patterns.
- Testing APIs using Swagger to ensure accurate functionality.
- Writing JUnit test cases to uphold code reliability and maintainability.
- Optimizing SQL queries and system components to reduce response time and improve overall system performance.
- Fixing critical bugs raised by the production team along with addressing security vulnerabilities.
- Assisting and mentoring junior developers during onboarding and workspace setup.

Deloitte USI – 31/01/2022 to 13/06/2025

US State Government Projects

1. GPS Project:

Led microservices development and API design for complex government systems.

2. Struts to Spring Boot Migration Project: June 2024 – June 13, 2025

- Single-handedly migrated legacy Struts application to Spring Boot microservices architecture using AI-assisted tools, delivering all components on time with high code quality and performance.
- Employed caching and performance optimization strategies.
- Led Agile ceremonies, collaborated cross-functionally, and mentored junior developers.
- Conducted comprehensive testing using Rest Assured and Postman.

Capgemini India – 20-03-2020 to 24-01-2022

Financial Services Project

- Delivered microservices applications using Core Java and Spring Boot.
- Developed CRUD APIs with Hibernate and optimized MySQL queries for better performance.
- Created JUnit test cases and validated APIs using Postman in an Agile environment.

Education:

Bachelor of Engineering in Electrical and Electronics Engineering

Hirasugar Institutes of Technology (VTU), Nidasoshi

June 2015 – May 2019 | 7.25 CGPA

Certifications:

Oracle Certified Java Associate (1z0-808), 2020

Agile Software Development (Coursera)

Agile with Atlassian Jira (Coursera)

Database Management Essentials (Coursera)

Achievements:

- Spot applause award for outstanding contributions in project exhibitions.
- Successfully resolved 1000+ production critical and security vulnerabilities within tight deadlines.
